### Abstract of **JP61236708**

PURPOSE:A cosmetic having improved water resistance and sweating resistance, controlling effect on sebum and durability of makeup, obtained by blending a cosmetic with zinc flower and/or zinc carbonate having specific surface area. CONSTITUTION:A cosmetic is blended with 0.1-50wt% based on the total amounts of cosmetic of zinc flower and/or zinc carbonate having 15-100m<sup>2</sup>/g, preferably 20-90m<sup>2</sup>/g specific surface area to give a cosmetic having improved durability of makeup. The zinc flower and/or zinc carbonate is instantly reacted with free fatty acids contained in sebum to gelatinize the sebum, so sebum secretion is suppressed, water resistance and sweating resistance are raised and controlling effects on sebum are improved to improve durability of makeup. When both zinc flower and zinc carbonate are used, a weight ratio of zinc flower to zinc carbonate is especially preferably 90:10-99:1.
